

Job Description: Backend Developer (Node.js)

Position: Backend Developer

Experience: 3+ Years

Location: Thane, MH, IN.

Employment Type: Full-Time

About the Role:

We are looking for a talented Backend Developer with 3+ years of experience in building robust, scalable, and high-performance backend systems. The ideal candidate should have expertise in Node.js, RESTful API development, and database management.

Key Responsibilities:

- Design, develop, and maintain backend services and APIs.
- Collaborate with front-end developers, product managers, and other stakeholders to deliver high-quality solutions.
- Optimize server-side logic for performance and scalability.
- Implement security and data protection best practices.
- Integrate third-party services and APIs.
- Conduct code reviews and maintain documentation.

Required Skills and Qualifications:

- Minimum of 3 years of hands-on experience in Node.js.
- Strong understanding of RESTful APIs and microservices architecture.
- Experience with database technologies like MySQL, PostgreSQL, MongoDB.
- Familiarity with cloud platforms like AWS, GCP, or Azure, VPS.
- Knowledge of version control systems (e.g., Git).
- Excellent problem-solving and debugging skills.

Nice to Have:

- Experience with GraphQL.
- Knowledge of CI/CD pipelines and containerization (Docker/Kubernetes).
- Familiarity with serverless architecture.

Benefits:

- Competitive salary.
- Opportunity to work on innovative projects and cutting-edge technologies.
- Professional growth and learning opportunities.
- Supportive and collaborative work environment.
